**Extended Day**

# Extended Day

*Our program is organized into five subject areas that are designed to provide your child with opportunities to learn valuable life skills and to reinforce the skills they're learning during the school day.*

Students explore the exciting world of science, technology, engineering, art and math (STEAM) through building projects, experiments, and design challenges. Sharing ideas, asking questions, and making predictions are encouraged!

Robust outdoor free play and structured games help students learn sportsmanship and develop their physical strength and endurance. Students learn critical thinking and problem solving by participating in board games and team challenges with their peers.

Students express themselves by participating in hands-on visual arts, including photography, videography, drawing, and painting. Students develop planning skills by working on long-term projects with their peers and can participate in group performances or discussions.

Social and emotional growth is nurtured through student and teacher led activities that promote a feeling of community and belonging. Students learn through open-ended activities that give them a chance to apply problem-solving skills and collaborate with friends.

Some students appreciate the chance for independent activities or study after a long day at school. We provide a quiet place to work on homework, read, journal, or seek academic support from peers and teachers. Students can also work on various projects in this small group setting.

# **Clubs & Enrichments**

For Pre-K students who are ready for more than rest time, this enrichment block offers active, engaging programs like soccer, drama, and yoga. Students build skills, confidence, coordination, and creativity while participating in upbeat, age-appropriate activities. It's the perfect way for our non-nappers to stay energized and excited during the afternoon.

## **Mondays - Music**

Seattle Trebleroo classes are designed to use music education to build social, physical, emotional and cognitive skills. Our students will learn basic music theories and explore multi-sensory experiences so they can better their concentration, memory and coordination. As a Trebleroo, each student will develop their own love for music and all of the benefits it provides.
